

Anti-slip Coated Layer Pads

 Suitable for a wide range of industries	 100% Recyclable; From 100% Recycled Materials	 Food Safe
 Best product performance on the market	 Suitable for automated lines and Machine fed processing	 Available in rolls & sheets
 Working with a leading European manufacturer of transport packaging solutions	 Stabilises loads over land & sea, and when transporting goods internally	 Cost savings from reduced damages in goods and transit claims

Product Description

Developed for protection and stabilisation of palletised goods. The slip angle of $>65^\circ$ (TAPPI T 548) makes it the highest performing anti-slip paper on the market.

This product will reduce costs associated with damaged goods, transit claims, and minimise disruptions in distribution channels.
