

Anti-slip Layer Pads

High-performance anti-slip coated sheets used between pallet layers to enhance load stability during storage, handling and transport. They provide extra friction, preventing shifting, sliding or collapse.

Key Advantages

- Improve pallet stability with high slip-resistance performance
- Reduce product shifting and load collapse during transport
- Lower incidence of damage-related claims

Performance

Characteristics

- Developed for protection and stabilisation of palletised goods
- Slip angle >65° (TAPPI T 548) – highest performing anti-slip paper
- Reduces damaged goods, transit claims & distribution disruptions

Typical Applications

- Transit packaging
- Food & beverage products
- Dairies and bagged goods
- Any palletised load requiring enhanced stability

Varieties

Standard sheet
Formats 750mm x
1,150mm.
Bespoke sizes
available.

Grammage

110, 150, 210,
290 gsm
